# Water Fast Facts

**Water is necessary for all  
living things.**

# Water Fast Facts

Water  
covers  
more than  
70% of the  
Earth.

# Water Fast Facts

**The percentage of water in the body declines with age.**

# Water Fast Facts

The amount of water on Earth does not change! It is the same water dinosaurs drank!

# Water Fast Facts

While a person can live for a few weeks without eating any food, that same person can only live a few days without water.

# Water Fast Facts

Water, when boiled, can kill bacteria and other harmful agents found on food or plates.

# Water Fast Facts

Water is the only substance that can get dirt and bacteria off of our bodies.

# Water Fast Facts

Water is also the only substance that can exist in all three states: gas, solid and liquid.

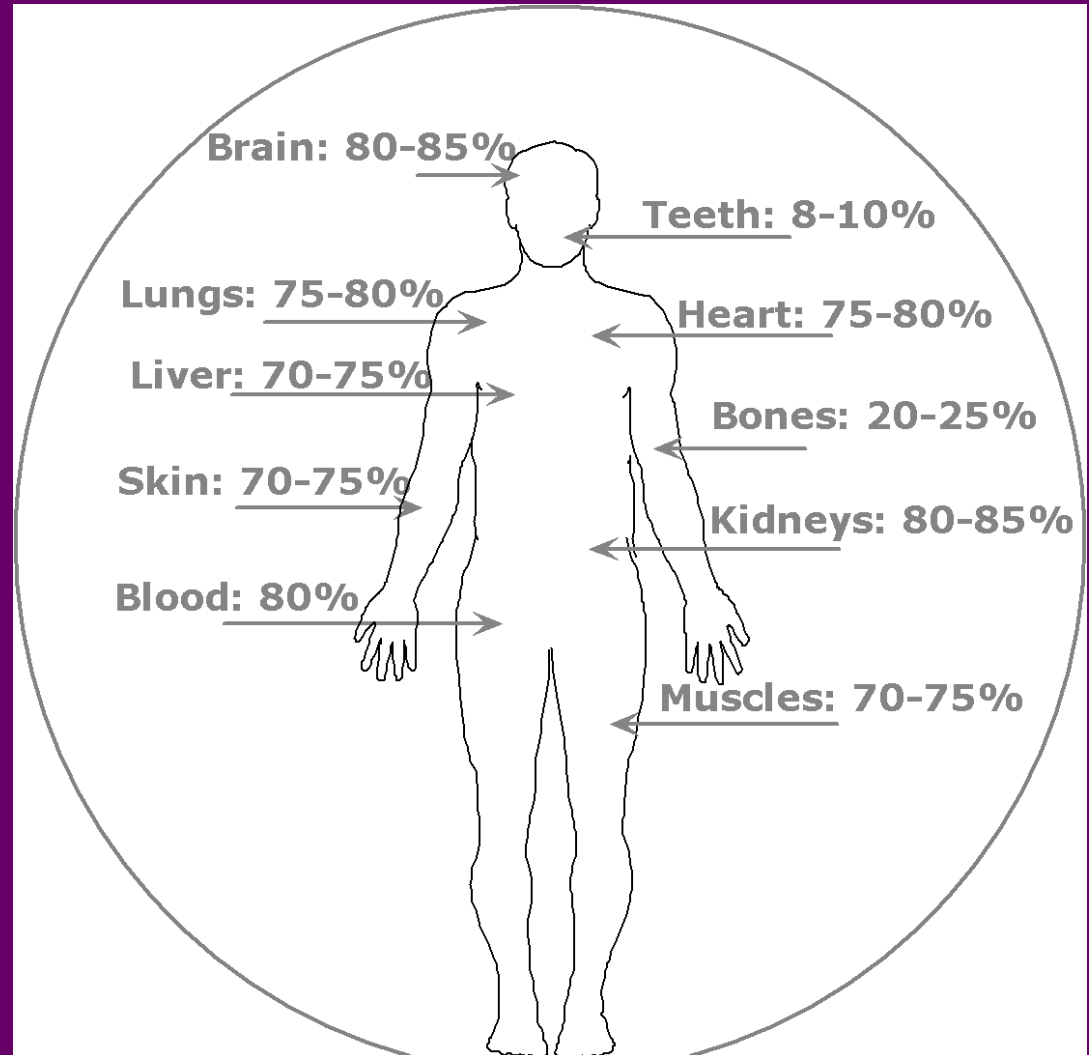

# Water Fast Facts

Plants are made up of 75% water. Seeds will not grow without water.

# Water Fast Facts

**Water  
replenishes  
the body  
faster than  
any other  
liquid.**

# The End
