

Hi! Thank you for visiting [thehomeschooldaily.com](http://thehomeschooldaily.com) ! I am so glad you were able to find a school tool you can use. Please feel free to use this activity for your own personal use or if you are the main teacher in a coop setting. I provide this free resource to encourage others to homeschool their own.

If you would like to share the file with others, I ask that you share by sending them a link to my website or to the page that hosts the file. Please do not send them a link directly to just the PDF file (the file you are at now).

You may not sell, copy, or alter my files as your own. You may not host my files on your own website without linking them to [thehomeschooldaily.com](http://thehomeschooldaily.com) or giving proper attribution to [thehomeschooldaily.com](http://thehomeschooldaily.com)

May you be blessed on your homeschooling journey.

♥ Marie

## Water Cycle Define & Draw

The Water Cycle Define & Draw is appropriate for older elementary all the way through middle school. I advise using “The Water Cycle” Slideshow to help you complete this activity. The drawings and definitions will vary upon age of student. You may want to require complete sentences or colored drawings. That is an aspect of this activity that you can dictate and customize. What are your expectations? You may require your student to orally present their graphic organizer to you or a sibling afterwards explaining each step of the water cycle. However you choose to use it, this graphic organizer is an effective comprehension checker. I have used this graphic organizer as a pre-writing activity also. It helps a student organize their paper before writing it wholly. Just an idea! Happy learning!

**DEFINE & DRAW:** Define each process of the Water Cycle and draw a picture to represent each.
