

Hi! Thank you for visiting thehomeschooldaily.com ! I am so glad you were able to find a school tool you can use. Please feel free to use this activity for your own personal use or if you are the main teacher in a coop setting. I provide this free resource to encourage others to homeschool their own.

If you would like to share the file with others, I ask that you share by sending them a link to my website or to the page that hosts the file. Please do not send them a link directly to just the PDF file (the file you are at now).

You may not sell, copy, or alter my files as your own. You may not host my files on your own website without linking them to thehomeschooldaily.com or giving proper attribution to thehomeschooldaily.com .

 Marie

May you be blessed on your homeschooling journey.

Life Cycle of a Spider Graphic Organizer & Poster

This is a simple way to reiterate the life cycle of a spider and reinforce comprehension. You can either have the child cut out the pictures of the life cycle of a spider or have them draw their own using the poster as a guide. I would encourage using the slideshow provided at The Homeschool Daily as an introduction or reading a book about spiders.

LIFE CYCLE OF A SPIDER

Female spiders lay eggs.

The eggs are wrapped with silk to make an egg sack.

Spider lings hatch from their eggs and leave the sack.

Mature adult spider

LIFE CYCLE OF A SPIDER

EGG

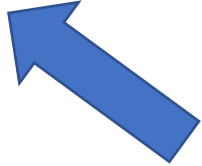

EGG SACK

SPIDER LING
