

Hi! Thank you for visiting [thehomeschooldaily.com](http://thehomeschooldaily.com) ! So glad you were able to find a school tool you can use. Please feel free to use this activity for your own personal use or if you are the main teacher in a coop setting. I provide this free resource to encourage others to homeschool their own.

If you would like to share the file with others, I ask that you share by sending them a link to my website or to the page that hosts the file. Please do not send them a link directly to just the PDF file (the file you are at now).

You may not sell, copy, or alter my files as your own. You may not host my files on your own website without linking them to [thehomeschooldaily.com](http://thehomeschooldaily.com) or giving proper attribution to [thehomeschooldaily.com](http://thehomeschooldaily.com) .

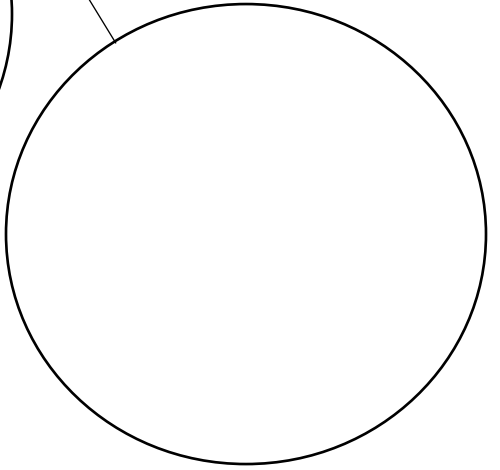

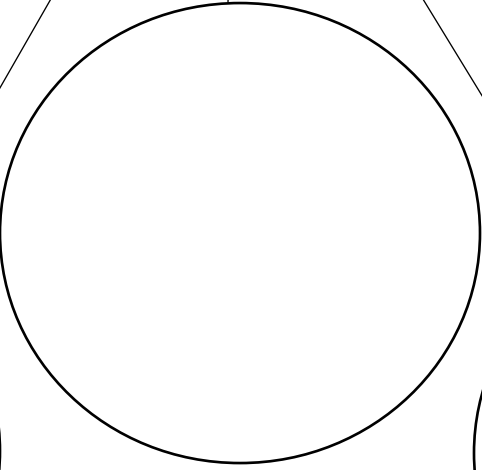

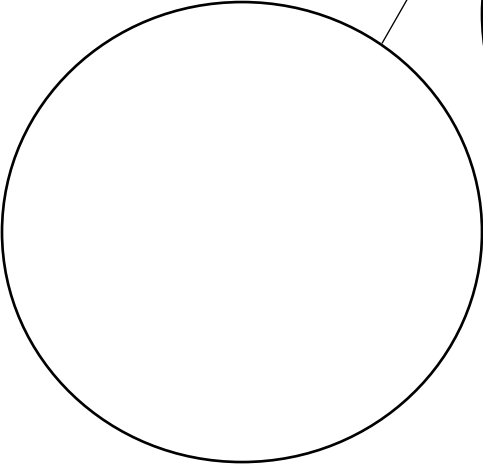

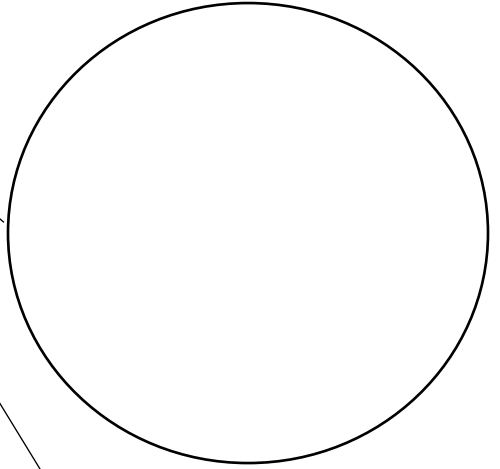

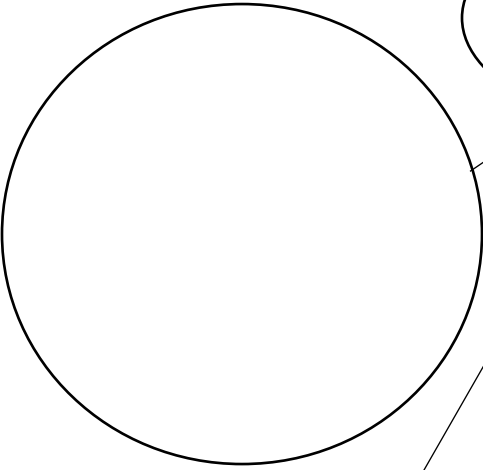

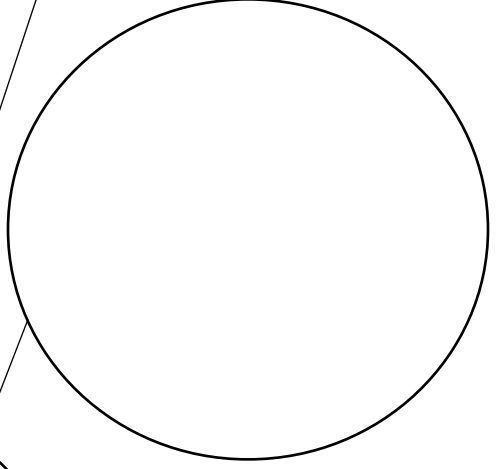

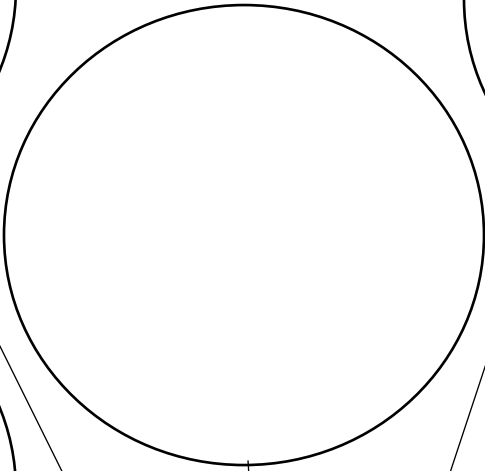

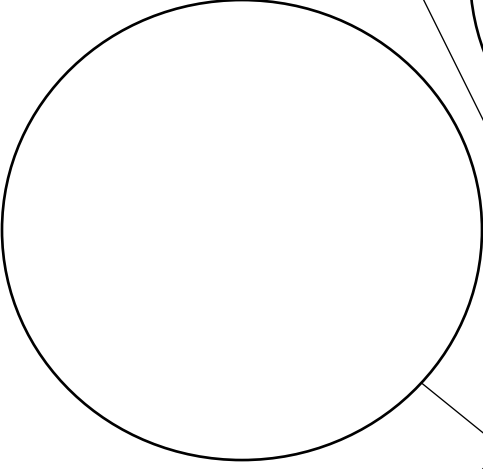

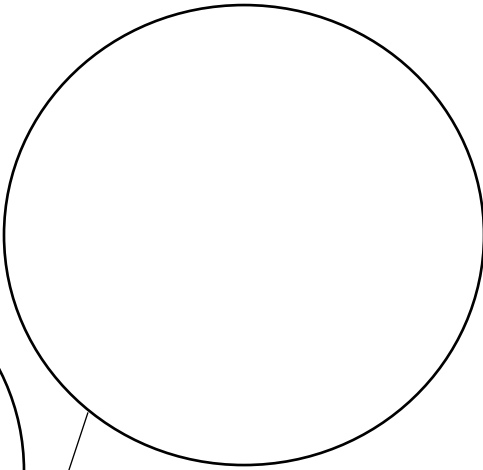

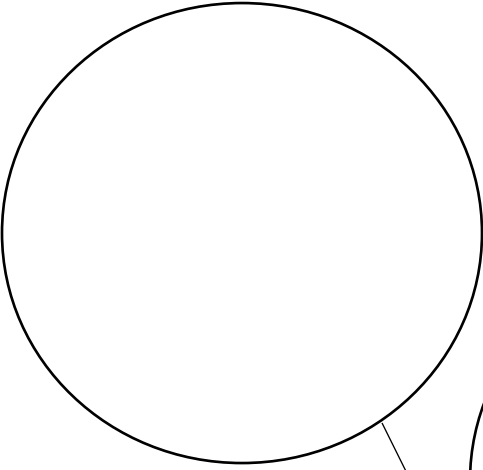

May you be blessed on your homeschooling journey.

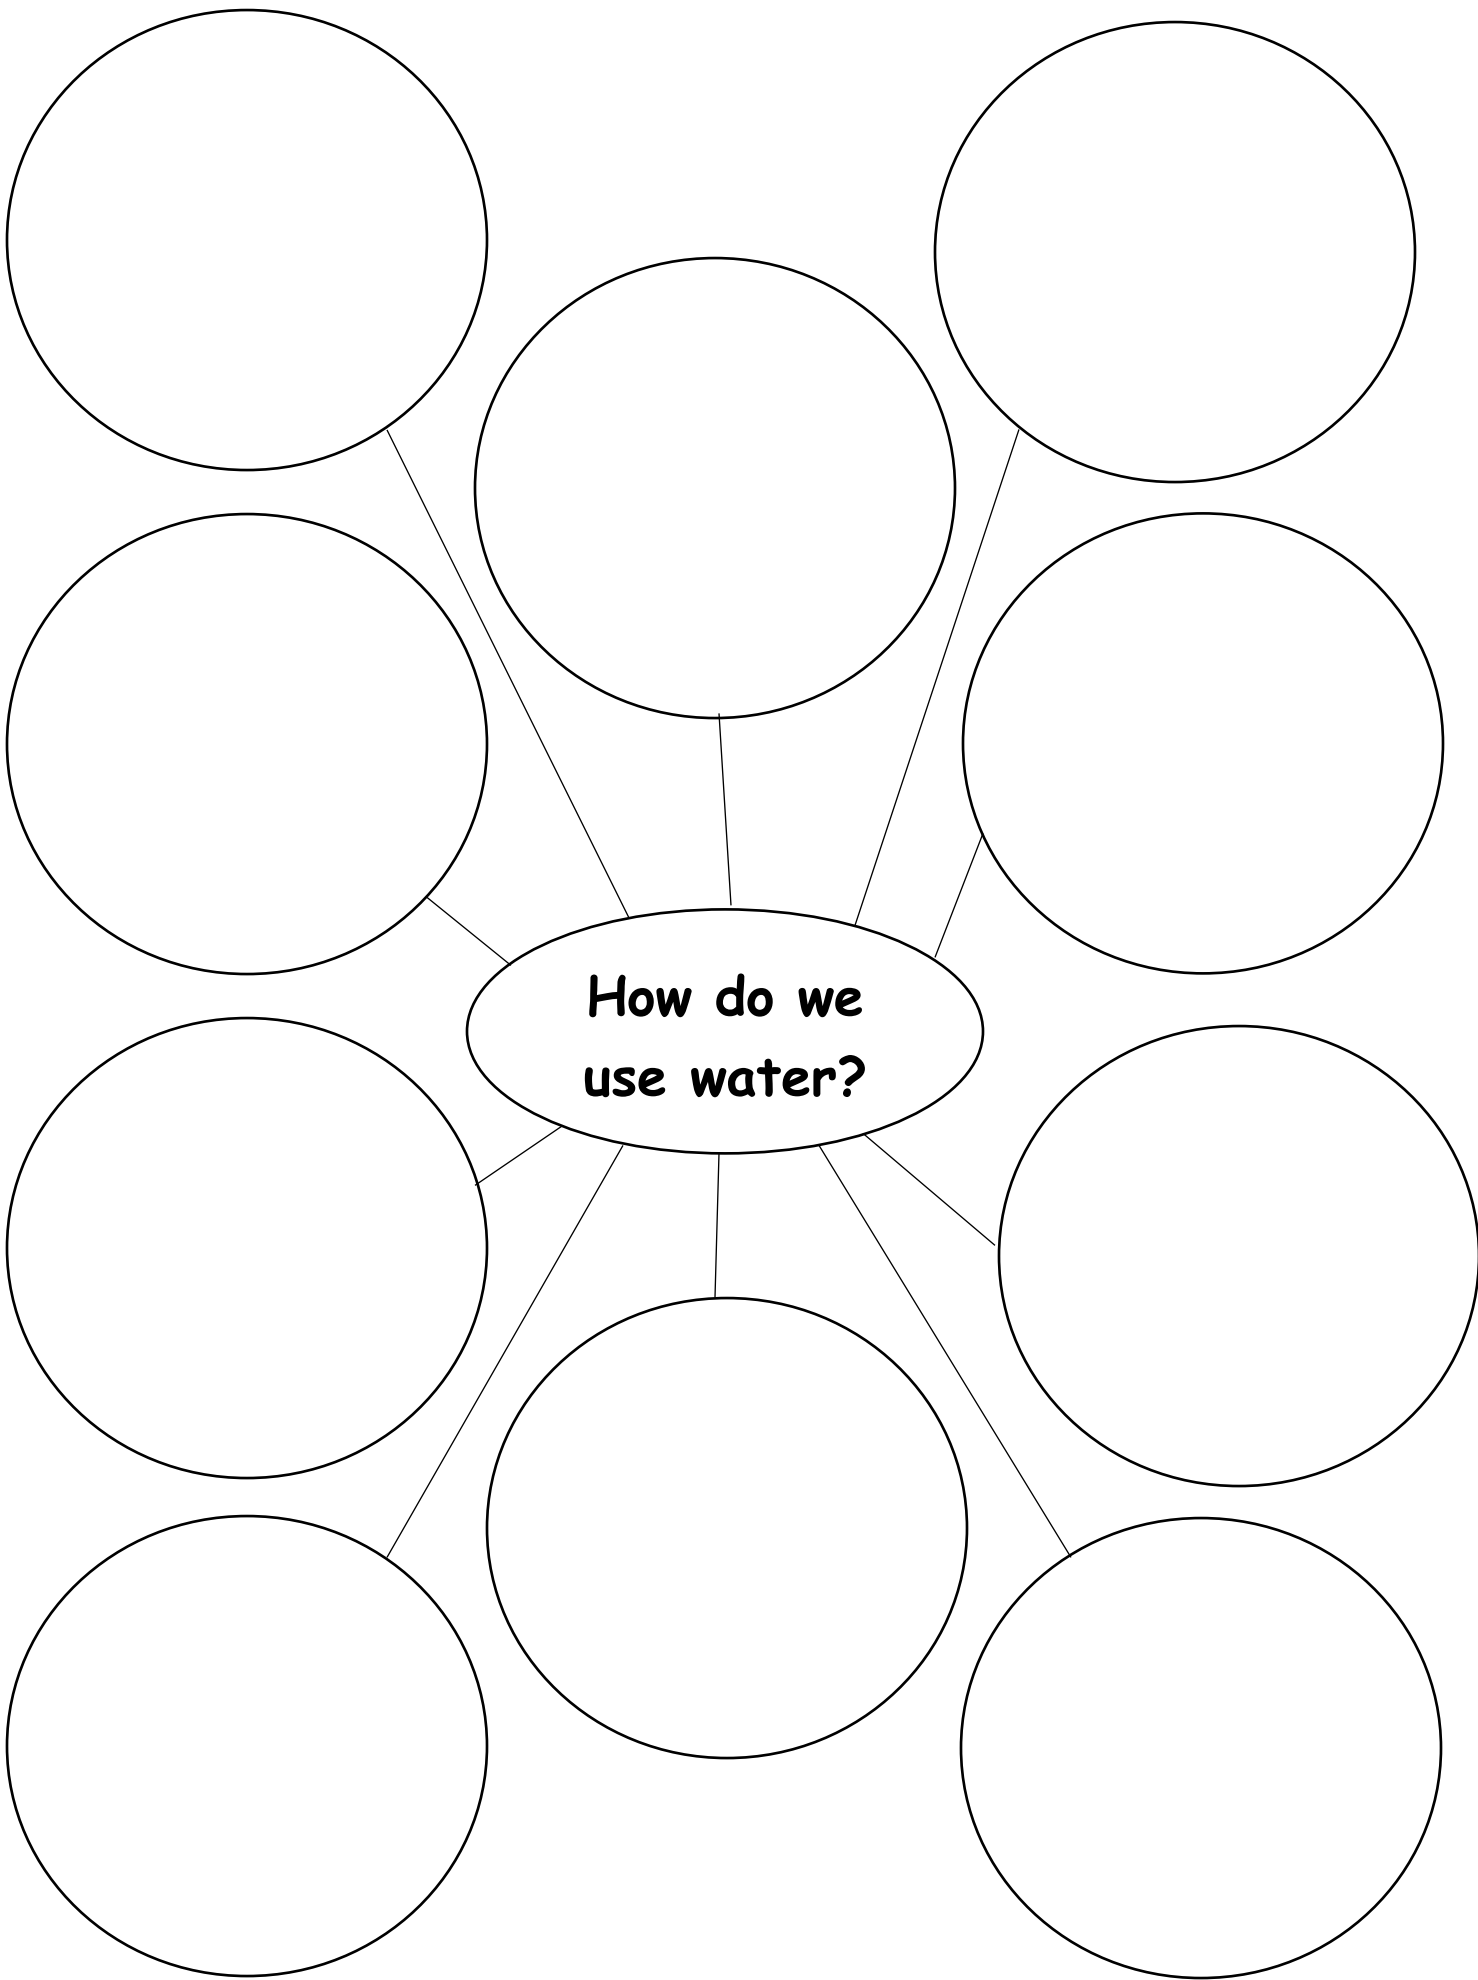

♥ Marie

## Water Concept Maps

Graphic organizers are useful tools to use for organizing and collecting information. Not only do they help with sorting through new material, but they are also effective in assisting a student in retaining knowledge. There are 2 Water Concept Maps. Use these concept maps to brainstorm the many ways that we use water or facts about water. Whichever one you use, these simple concept maps can be used to help your students brainstorm their own ideas or summarize important water facts that they learn through books or videos. Happy learning!

**Facts about  
Water**

**How do we  
use water?**
