

Hi! Thank you for visiting thehomeschooldaily.com ! So glad you were able to find a school tool you can use. Please feel free to use this activity for your own personal use or if you are the main teacher in a coop setting. I provide this free resource to encourage others to homeschool their own.

If you would like to share the file with others, I ask that you share by sending them a link to my website or to the page that hosts the file. Please do not send them a link directly to just the PDF file (the file you are at now).

You may not sell, copy, or alter my files as your own. You may not host my files on your own website without linking them to thehomeschooldaily.com or giving proper attribution to thehomeschooldaily.com .

May you be blessed on your homeschooling journey.

♥ Marie

Oobleck Challenge

The Oobleck Challenge is an extension of the lab investigation of Oobleck. Oobleck is a substance that encompasses properties of both a liquid and a solid. To get students to think critically, they are posed with this challenge, *“Design a spacecraft that could land on a planet made of Oobleck.”* The activity sheet allows for the student to draw his or her spacecraft out in detail. Encourage students to label their design with words like rocket boosters and air thrust hoses. Encourage them to be creative. Not only are they required to illustrate their spacecraft, but they should explain their design in detail and why it will enable their vehicle to land on a ground of Oobleck. Take care 😊

Design a spacecraft that could land on a planet made of Oobleck.
