FOR THE TEACHER...

Our Famous Scientists & Inventors Draw & Write sheets are a perfect avenue for those of you wanting to marry writing and science. Pair these writing sheets with an educational video and science reader, and you have an elementary science lesson ready to go.

In the **draw section**, encourage your student to draw something that represents what the scientist discovered or studied. For the inventors, draw something that represents what they invented or how it affected the world.

In the **writing section**, ask your student to write about their picture explaining what it is the scientist or inventor did. This is a great time to reiterate what the famous figure did, studied, discovered, or invented.

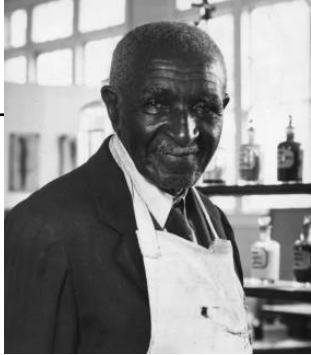

Remind your students to use capital letters and punctuation. The idea of the Draw & Write sheets is to recall the science information so that they can write it. This encourages comprehension and writing of sentences.

One year, we used a variety of these sheets along with our Science topics Draw & Write sheets to create a science journal. It was a successful way to teach science and writing at the same time.

Sincerely,

Marie
