There are 3 main forms of patterns that are made by the ridges of fingerprints.

1) Loops

Loops make up almost 70% of fingerprint patterns. They originate from one side of the finger, curve around or upward, before exiting out the other side. A loop pattern always comprises one delta, which is roughly a triangular formation in the pattern.

2) Arches

Arches are encountered in only 5% of the patterns, and comprise lines that slope upward and then down, like the outline of a small hill. There is generally no delta.

3) Whorls

Whorls constitute around 25% of all patterns. They are circular or spiral patterns. A pattern that contains 2 or more deltas will always be a whorl pattern.
